

POWER OF PEACE

Dear Congress Person / Senator,

I have joined the Power of Peace's Not Made In China initiative (NMIC) and fully support their position that every product sold online on e-commerce websites or via printed catalogs must include clear and visible information on the Country of Origin for that product.

The need for this information is no more evident than right now with the recent rash of recalls of products manufactured in China. Consumers have a right to know where and how products are being made and what the potential impact is to our environment and our health. Manufacturers and suppliers have an obligation to publish factual data about where their products are made, whether it is China or other countries around the world.

With this basic information, Americans can make informed decisions about their purchases. With this necessary information, Americans can make conscious decisions not to buy products that are for example manufactured in China, a country whose environmental crisis is so large in scale, it constitutes a global Human Rights Abuse, or any other country that uses child labor, has inhumane working conditions, or abuses the rights of women.

Americans will always stand up for what's right. These regional and global abuses take place only because our citizens have no direct way to fight back. We want clear, unambiguous, legislation that mandates Country of Origin of every product sold online or via catalogs. NO exceptions. NO favors.

We need leadership to protect our environment, our health and our children's future. Please get back to me confirming your intent to stand behind this initiative. The Power of Peace will soon publish a list of Senators and Congress People who have committed to support drafting this legislation.

I hope you will join us and support this most important issue.

Thank you,

Concerned Consumer
